

SUSTAINABLE FUTURES

Exploring current environmental, economic and political concerns

How to solve the ecological, economic and social crises coming our way?

Tell a feel good story about solutions.....

When a special briefing for the journal Nature announced the possible extinction of a part of mankind before the end of the 21st century, Cyril Dion and Mélanie Laurent's team set out to investigate what may lead to this disaster and above all how to avoid it.

During their journey to ten different countries they met the pioneers who are re-inventing agriculture, energy, economy, democracy and education.

Joining those concrete and positive actions which are already working, they began to figure out what could be tomorrow's world
